

Headlines Advinus Therapeutics of India Selects Provantis 8 to Automate Drug Development Processes **Date** January 16 2007 **Description**

Global information solutions provider, announced today that Advinus Therapeutics has chosen Provantis 8 as their exclusive pre-clinical solution.

Advinus Therapeutics, located in Pune and Bangalore, India, is a pharmaceutical R&D organization focused on drug discovery while also providing comprehensive pre-clinical and clinical development services within the pharmaceutical and agrochemical sectors.

To enhance client services, attract western business and support GLP compliance, Advinus began evaluating solution providers in late 2005.

We selected Provantis because of Instems proven record for successful on-site deployments and quality-focused programs designed to enhance and maximize the use of their solution, comments Dr. Nimish Vachharajani, Head of Pharmaceutical and Agro Chemical Development at Advinus. A number of our current and potential clients also use Provantis which would create a seamless interface between companies.
