

WE OFFER NATIONWIDE FIELD TRIALS ON WIDE RANGE OF CROPS

Rice

Wheat

Pulses

Fruits and
vegetables

Cotton

Sugarcane

Corn

Specialised crops /
Plantation crops
(coffee/tea/
cardamom, etc.)

We test agri input products

- Insecticides/Acaricides
- Fungicides/Bactericides
- Herbicides
- Seed & seed treatment products
- PGRs
- Fertilizers/Macro/Micro nutrients

End-to-end agrochemicals testing

- Bio-efficacy
- Phytotoxicity
- Compatibility (Efficacy & Phytotoxicity)
- Effect on natural enemies
- Nutrient uptake
- Semi field efficacy (Lab studies with field collected pests)
- GLP/Non-GLP - Residue/ Persistencey
- Soil dissipation

EFFICACY OF PESTICIDE FOR HOUSEHOLD AND PUBLIC HEALTH USE

- Efficacy lab and field
- Surface efficacy and persistency
- Repellency
- Ectoparasites efficacy on animals
- Public health studies on pest control

Insectary (Culture available for testing)

Mosquitoes (*Aedes*,
Anopheles and
Culex species)

Bedbug
(*Cimex lectularius*)

Stored Grain Pests
(*Callosobruchus*,
Sitophilus and *Tribolium*)

Housefly
(*Musca domestica*)

Cockroaches (American
and German)

Offered services

- Bioefficacy coil, Mat, LVs, Aerosol in PG chamber (regulatory and R&D)
- Room chamber tests (mostly R&D)
- Bait efficacy and persistency
- Surface efficacy and persistency
- Mosquito repellency applied on human skin
- Larvicidal efficacy (lab and field)
- New protocol development for R&D studies
- Studies on mosquito net and Long-lasting insecticidal nets (LLIN)
- Studies for control of Ectoparasites on animals
- Studies for Bedbug controlling agents
- Studies for Termite controlling agents
- Studies for public health studies on pest control products
